

Atlas of the World

The distortion of this map is relatively small due to its elliptical shape. The center of the map remains undistorted, however the closer to the north and south poles, the distortion increases because of the 2-D restrictions. The limited distortion of this map throughout the extent makes it a good atlas of the world for young children to learn the relative shapes of countries and their position on the earth.

Spatial Reference
Name: World Eckert III
PCS: World Eckert III
GCS: GCS WGS 1984
Datum: WGS 1984
Projection: Eckert III
Central Meridian: 0.0000
Latitude of Origin: 0.0000
Longitude of Origin: 0.0000
Latitude of Center: 0.0000
Longitude of Center: 0.0000
Latitude of 1st: 0.0000
Longitude of 1st: 0.0000
Latitude of 2nd: 0.0000
Longitude of 2nd: 0.0000
False Easting: 0.0000
False Northing: 0.0000
Central Parallel: 0.0000
Standard Parallel: 0.0000
Standard Parallel 2: 0.0000
Scale Factor: 0.0000
Azimuth: 0.0000
Units: Meter
